Arpit, Bimal, Chatur, Dinu and Elan has participated in a tournament namely 'Freaket' and played 4 matches in total. The below table gives partial information about their individual scores and total runs scored by them in each match as a team.

In the following table, each column has 2 values missing. The missing scores are scored by 2 lowest scorers in that match. None of the two missing values is more than 10% of the total runs scored in that match.

		Match-1	Match-2	Match-3	Match-4
Runs scored by player	Arpit		100		53
	Bimal	88	65		52
	Chatur			110	
	Dinu	72	75	20	56
	Elan	60		78	
Total		270	300	240	200

The players are ranked 1 to 5 on the basis of the total runs scored by them in the four matches, with the highest scorer getting Rank 1. If it is known that no two players scored the same number of total runs, how many players are there whose rank can be exactly determined?
