

**SECTION 1 - SECTION 1**

**Question No.1**

The smell of burning hair indicates \_\_\_\_\_ fiber

- Silk
- Cotton
- Polyester
- Rayon

**Question No.2**

The vitamin which is not present in plant foods

- Vitamin B<sub>1</sub>
- Vitamin B<sub>12</sub>
- Vitamin B<sub>6</sub>
- Vitamin B<sub>2</sub>

**Question No.3**

The resource that is available in equal amount for each and every member is

- Money
- Skills
- Time
- Energy

**Question No.4**

The statistical analysis that combines the results of multiple scientific studies is called

- Cross cultural study
- Meta analysis
- Cross sectional study
- Observational study

**Question No.5**

Systematic desensitization is a type of behavioral therapy to overcome

- Attention deficit disorders
- Anxiety

- Depression
- Phobia

### Question No.6

The calorie content of dietary fibre is

- 6 calories
- 0 calories
- 4 calories
- 2 calories

### Question No.7

The properties of synthetic fabrics which has been enhanced by micro fibres is

- Abrasion resistance
- Heat resistance
- Drapability
- Dimensional stability

### Question No.8

The first step in the design process involves

- Concept development
- Production prototype
- Sketching to scale
- Analysis and planning

### Question No.9

Fibres which catch fire easily with paper smell is

- Mineral fibre
- Cellulose fibre
- Synthetics
- Protein fibre

### Question No.10

The development of the body from the center of the body to outward is referred as

- Terminal-distal
- Longitudinal
- Proximodistal

- 
- Cephalocaudal

**Question No.11**

The colour which is a symbol of royalty is

- Purple
- Red
- Lavender
- Magenta

**Question No.12**

How many colours combines Double complementary colour harmony?

- Seven
- Nine
- Five
- Four

**Question No.13**

Fashion comes from the Latin word "Facere" which means

- To change
- To promote
- To showcase
- To create

**Question No.14**

An action that becomes automatic with repetition is called as a

- Play
- Need
- Interest
- Habit

**Question No.15**

The -----degrees in a pie chart correspond to 100 per cent of a data distribution.

- 360
- 180
- 90

**Question No.16**

The income which is received from goods and services are referred to as

- Real income
- Personal income
- Passive income
- Earned income

**Question No.17**

The practice of having more than one spouse is called

- Polygyny
- Polydysmy
- Polyandry
- Polygamy

**Question No.18**

ECCE means

- Early childhood care and Evolution
- Early childhood care and Evaluation
- Early childhood care and Emergency
- Early childhood Care and Education

**Question No.19**

The chemical composition of Cotton fibre is

- Keratin
- Sulphur
- Cellobiose unit
- Sericin

**Question No.20**

A narrow version of the shawl is known as

- Dupatta
- Scarf
- Stole
- Cravat

**Question No.21**

The graph which uses symbols and figures to indicate the data given in numerical tables is

- Logarithmic graph
- Line graph
- Isometric graph
- Pictograph

**Question No.22**

Harmony in design indicate

- Relaxation
- Focus
- Unity
- Scale

**Question No.23**

Turkey Towels are woven by

- Twill weave
- Leno weave
- Dobby weave
- Pile weave

**Question No.24**

Under MGNREGA employment is given for \_\_\_\_\_ days

- 200
- 100
- 365
- 50

**Question No.25**

Wernicke's encephalopathy is due to the deficiency of

- Thiamin
- Riboflavin
- Cyanocobalamin
- Niacin

**Question No.26**

The heading of a row in a statistical table is known as

- Stub
- Title
- Body
- Caption

**Question No.27**

Basic Education was given by

- Tarabai odak
- Rabindranath Tagore
- Jawaharlal Nehru
- Mahatma Gandhi

**Question No.28**

Body mass index <18.5 indicates

- Normal
- Overweight
- Obese
- Underweight

**Question No.29**

Which of the following nutrients show a dramatic increase in absorption during pregnancy?

- Thiamin and ascorbic acid
- Calcium and iron
- Salt and sugar
- Protein and fat

**Question No.30**

ICDS comes under the Ministry of

- Rural Development
- Social Justice and Empowerment
- Women and Child Development
- Human Resource Development

**Question No.31**

The monocytes enlarge and become the

- Macophages
- Plasma cells
- Phagocytes
- Lymphoblasts

**Question No.32**

Research in which the same individuals are studied across relatively longer periods of time is

- Case study
- Autobiography
- Cross sectional study
- Longitudinal study

**Question No.33**

During the late childhood and adolescent periods, nutrient needs are greatly increased for:

- Calcium, Zinc and Iron.
- Vitamin A, Vitamin D and Calcium
- Vitamin C, Folate, and Zinc.
- Vitamin B-6, Vitamin B-12 and Folate.

**Question No.34**

Gluconeogenesis means

- Synthesis of glucose
- Synthesis of glycogen
- Synthesis of glucose from non carbohydrate
- Breakdown of glucose

**Question No.35**

Questionnaire is a

- Measurement technique
- Tool for data collection
- Data analysis technique
- Research method

**Question No.36**

Sundry items' or 'sundries' are an essential component in

- Worksheet
- Weekend schedule
- Household budget
- House plan

**Question No.37**

Developmental tasks were formulated by

- Skinner
- Havighurst
- Piaget
- Kohlberg

**Question No.38**

Theory of cognitive development dealing with the nature and development of human intelligence was proposed by

- Horney
- Sullivan
- Watson
- Piaget

**Question No.39**

Osteoporosis caused due to \_\_\_\_\_ deficiency

- Iron
- Calcium
- Magnesium
- Sodium

**Question No.40**

Roasting and simmering is involved in the preparation of

- Pulao
- Chutney
- Cutlet
- Payasam

**Question No.41**

Menopause means

- Cessation of menstruation
- Over bleeding
- Beginning of menstruation
- Scanty bleeding

**Question No.42**

Which one of the following does not coming under prefactory items in a research report?

- Title page
- Bibliography
- Table of contents
- Abstract

**Question No.43**

The direction of yarn in a fabric is referred as

- Grain
- Warp
- Selvedge
- Seam

**Question No.44**

Drawing instruments are used to prepare neat drawings which are

- Miniature sized
- Photographic
- Scaled
- Pictorial representations

**Question No.45**

Community Development Programme was implemented in the year

- 1951
- 1957
- 1952
- 1947

**Question No.46**

Out of school system of education is called as

- Casual education
- Non-formal education
- Informal education
- Extension education

**Question No.47**

In humans, nitrogens of amino acid is removed as ----

- Ammonia
- Urea
- Uric acid
- None of these

**Question No.48**

The process by which cotton is separated from seed is

- Scouring
- Harvesting
- Ginning
- Spinning

**Question No.49**

Soft diet provides ----- protein

- 35-40g
- 10-20g
- 10-15g
- 10-18g

**Question No.50**

The characteristic fishy odour is due to the production of

- Tetramethylamine
- Dimethylamine
- Trimethylamine
- Methylamine

**Question No.51**

According to UNICEF, ECD (Early Childhood Development) is an approach to policies and programmes for the following except

- Students and volunteers
- Caregivers
- Parents of children
- Children of early childhood years

**Question No.52**

Among resources which is both a resource and a measure of resource?

- Skill
- Ability
- Attitude
- Money

**Question No.53**

The gland which functions as both an exocrine and endocrine gland

- Sweat gland
- Thyroid gland
- Salivary gland
- Pancreas

**Question No.54**

Home Management is a

- Physical process
- Psychological process
- Social process
- Mental process

**Question No.55**

The period before birth is called as

- Peri – natal
- Post – natal
- Pre – natal
- Neo – natal

**Question No.56**

Resolution of conflict is

- Assimilation
- Accommodation
- Co-operation
- Competition

**Question No.57**

The Speech which requires limited amount of preparation and performance without a text is known as

- Huddled Speech
- Extemporaneous speech
- Persuasion speech
- Impromptu speech

**Question No.58**

The centre through which ICDS services are provided is called as

- Balwadi
- Anganwadi
- Child care centre
- Day care centre

**Question No.59**

The condition specifically associated with the elderly is

- Alzheimer's disease
- Gaucher's disease
- Addison's disease
- Wilson's disease

**Question No.60**

Xerophthalmia is the deficiency of

- Vitamin K
- Vitamin D
- Vitamin E
- Vitamin A

**Question No.61**

Which one among the following is classified under low visibility colour?

- Green
- Red
- Orange
- Yellow

**Question No.62**

\_\_\_\_\_ is the difference between “what is” and “what ought to be”

- Wants
- Desire
- Need
- Interest

**Question No.63**

The merchandising involves the indentifying and serving the market niche

- Micro
- Target
- Macro
- Intermittent

**Question No.64**

Style that takes decades to move through the whole fashion cycle is

- Formal
- Classic
- Modern
- Traditional

**Question No.65**

Babies born before 37 weeks of gestation are called

- Low birth weight babies
- Non developed babies
- Preterm babies
- Immature babies

**Question No.66**

The structure which make wool suitable for dyeing

- Hydrophobic structure

- Crystalline structure
- Elasticity
- Amorphous structure

**Question No.67**

The scientific study of man and his working environment is

- Ergonomics
- Social studies
- Demography
- Occupational Studies

**Question No.68**

IMR refers to

- Infant Mortality Rate
- Infant Mortality Reduction
- Infant Morbidity Rate
- Infant MorbidityReduction

**Question No.69**

What is the function of bile?

- It enhances absorption of complex carbohydrates.
- It protects stomach and small intestine from hydrochloric acid.
- It emulsifies fats.
- It initiates digestion of protein.

**Question No.70**

Pavlov studied the conditioning related to

- Classical conditioning
- Operational conditioning
- Observant conditioning
- Instrumental conditioning

**Question No.71**

CFTRI is located in

- Mumbai
- Delhi

- Hyderabad
- Mysore

**Question No.72**

Silk fabrics can be washed by

- Beating
- Brushing
- Washing machine
- Kneading and Squeezing

**Question No.73**

Which research strategy is the BEST for determining cause and effect relationships?

- Observational
- Descriptive
- Experimental
- Correlational

**Question No.74**

The parenting style by Baumrind is considered to be most ideal for positive development in children?

- Dominant
- Permissive
- Protective
- Authoritative

**Question No.75**

Which of the following is the floor decoration of Tamil Nadu?

- Alpana
- Kolam
- Rangoli
- Moggule

**Question No.76**

During Nutrition surveys weight of a person is checked now and then to ensure \_\_\_\_\_ of the weighing scale

- Usability

- Validity
- Measurability
- Reliability

**Question No.77**

The measure of the relationship between two characteristics is known as

- Analysis of variance
- Regression
- Correlation
- t-test

**Question No.78**

The process of removal of short fibre is called

- Carding
- Roving
- Combing
- Coughing

**Question No.79**

The sequence in the element of communication process

- SMCRE
- SCMRE
- SMRCE
- SMCER

**Question No.80**

The sampling method which is a probability method is

- Purposive sampling
- Simple random sampling
- Convenience sampling
- Judgement sampling

**Question No.81**

Indicate the steps in the management process in the sequential order

- Planning, organizing, controlling, evaluating
- Mapping, organizing, controlling, evaluating

- Planning, evaluating, controlling
- Planning, organizing, evaluating

**Question No.82**

According to the principles of preservation, keeping out of micro-organism is termed as

- Blanching
- Filtration
- Asepsis
- Radiation

**Question No.83**

Normal range of blood sugar level is \_\_\_\_\_

- 120 to 140 mg/dl
- 80 to 120 mg/dl
- 60 to 80 mg/dl
- 50 to 80 mg/dl

**Question No.84**

Irregular curves are drawn using the

- Protractor
- French curves
- Template design
- Campass

**Question No.85**

Substance which is foreign to the human body is called

- Synbiotic
- Xenobiotic
- Antibiotic
- Antibody

**Question No.86**

Gerontology is the study of

- Infants
- Children
- Aged

- 
- Genes

**Question No.87**

Babinski reflex means

- Fanning of toes
- Turning the head
- Grasping something
- Swallowing milk

**Question No.88**

“The weight of the child varies according to his age”. Under which variable will you categorize the weight of the child?

- Discrete Variable
- Dependent Variable
- Independent Variable
- Intervening Variable

**Question No.89**

The first step of decision making process is

- Hypothesis
- Identification of the problem
- Solving the problem
- Obtaining feedback from the target group

**Question No.90**

Which of the following is the first step in starting the research process?

- Identification of problem
- Survey of related literature
- Searching sources of information to locate problem.
- Searching for solutions to the problem

**Question No.91**

Families are viewed from a systems format because they provide a way to

- Understand natural phenomena
- Comprehend the impacts on the environment
- Understand the impacts on society

Capture the entire dynamics of family life

**Question No.92**

Radio is an example for

- Cold media
- Fibre-optics media
- Hot media
- Transmission media

**Question No.93**

Values can be classified

- (i) Extrinsic
- (ii) Intrinsic
- (iii) Subjective
- (iv) Objective

- (i) and (ii)
- (i), (ii) and (iii)
- (i), (ii), (iii) and (iv)
- (iii) and (iv)

**Question No.94**

The site of contour lines are shown by

- Oblique lines
- Zig-zag lines
- Dotted lines
- Straight lines

**Question No.95**

Mercerization using caustic soda is carried out for the improvement of

- Softness
- Strength and luster
- Fibre wetting
- Degree of whiteness

**Question No.96**

Gram sabha is at

- Village level
- Taluk level
- State level
- District level

**Question No.97**

Who among the following is the Nationally and Internationally reputed Home Scientist?

- Dr.Rajammal P.Devadas
- Dr. Muthulakshmi Reddy
- Dr. Ela Bhatt
- Dr.Vandhana Siva

**Question No.98**

The increasing independence that comes with adolescence can cause nutritional problems, because many adolescents

- take medications that diminish the nutritional value of food
- are uninterested in or unaware of the importance of good nutrition
- spend their food money on illegal drugs
- have decreased appetite after their major growth spurt has taken place

**Question No.99**

The wool which is obtained from 12-14 months old sheep is known as

- Pulled wool
- Hogget wool
- Lamb's wool
- Taglock wool

**Question No.100**

A simulated treatment that lacks the active ingredient in clinical efficacy trials is called

- Subjective experiment
- Objective experiment
- Placebo
- Nocebo
