

| Sr. No. | Client Question ID | Question Body and Alternatives | Marks | Negative Marks |
|--------------------|--------------------|---|-------|----------------|
| Objective Question | | | | |
| 1 | 1 | <p>Let $f: S \rightarrow T$ be continuous function between metric spaces and X be a subset of S.</p> <p>(i) If X is compact then $f(X)$ is compact. (ii) If X is connected then $f(X)$ is connected.</p> <p>A1 : Both (i) and (ii) are true.</p> <p>A2 : (i) is true but (ii) is not true.</p> <p>A3 : (ii) is true but (i) is not true.</p> <p>A4 : Neither (i) nor (ii) is true.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 2 | 2 | <p>For any elements a, b in a group G</p> <p>(i) $(aba^{-1})^n = ab^n a^{-1}$ (ii) $(ab)^n = a^n b^n$</p> <p>A1 : Both (i) and (ii) are true.</p> <p>A2 : (i) is true but (ii) is not true.</p> <p>A3 : (ii) is true but (i) is not true.</p> <p>A4 : Neither (i) nor (ii) is true.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 3 | 3 | <p>Let G be a finite group and for an element a of G let $C(a)$ denote the conjugate class of a.</p> <p>(i) $C(a)$ is a subgroup of G (ii) order of $C(a)$ divides order of G. (iii) distinct conjugate classes are disjoint and all of their union is G.</p> <p>A1 : All (i) , (ii) and (iii) are true</p> <p>A2 : Both (i) and (ii) are true but (iii) is not true.</p> <p>A3 : Both (i) and (iii) are true but (ii) is not true.</p> <p>A4 : Both (ii) and (iii) are true but (i) is not true.</p> | 4.0 | 1.00 |

| | | | | |
|--------------------|---|--|-----|------|
| | | : | | |
| Objective Question | | | | |
| 4 | 4 | <p>Suppose a group G contains elements a and b with $o(a) = 4$, $o(b) = 2$ and $a^3b = ba$. Then $o(ab)$ is equal to</p> <p>A1 2 :</p> <p>A2 4 :</p> <p>A3 6 :</p> <p>A4 8 :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 5 | 5 | <p>Let $f: G \rightarrow H$ be a group homomorphism. Suppose e is identity element of G. Then $f(e)$ is identity element of H</p> <p>A1 only if f is an isomorphism. :</p> <p>A2 only if f is injective, but need not be isomorphism. :</p> <p>A3 only if f is surjective, but need not be isomorphism. :</p> <p>A4 is a true statement. :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 6 | 6 | <p>Let G be a finite group. Then the product of all elements of G is equal to identity element</p> <p>A1 if G is a cyclic group any order. :</p> <p>A2 if G is a cyclic group of even order, but it is not true if G is of odd order. :</p> <p>A3 if G is abelian group of odd order, but it is not true if G is of even order. :</p> <p>A4 is always a true statement. :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 7 | 7 | <p>Let G be a finite group of order n. Then the statement that for a divisor d of n, G has a subgroup of order d</p> <p>A1 is always true. :</p> <p>A2 is true only if d is a prime number :</p> <p>A3 is true if d is a power of a prime number.</p> | 4.0 | 1.00 |

| | | | | |
|--------------------|----|--|-----|------|
| | | : A4 is true if d is a product of distinct primes. : | | |
| Objective Question | | | | |
| 8 | 8 | (i) An abelian group of order 32 is cyclic. (ii) An abelian group of order 210 is cyclic. A1 Both (i) and (ii) are true. : A2 (i) is true but (ii) is not true. : A3 (ii) is true but (i) is not true. : A4 Neither (i) nor (ii) is true. : | 4.0 | 1.00 |
| Objective Question | | | | |
| 9 | 9 | Let R be a commutative ring with identity. Then cancellation law with respect to multiplication holds (i) if R has no zero divisors. (ii) if R is a finite ring. A1 Both (i) and (ii) are true. : A2 (i) is true but (ii) is not true. : A3 (ii) is true but (i) is not true. : A4 Neither (i) nor (ii) is true. : | 4.0 | 1.00 |
| Objective Question | | | | |
| 10 | 10 | Which one is not a correct statement? A1 $R[x]$ is an integral domain if R is an integral domain. : A2 $R[x]$ is an Euclidean domain if R is an Euclidean domain. : A3 $R[x]$ is unique factorization domain if R is a unique factorization domain : A4 $R[x]$ is principal ideal domain if R is a field. | 4.0 | 1.00 |
| Objective Question | | | | |
| 11 | 11 | Let $f(x)$ be a polynomial with integer coefficients. (i) If $f(x)$ is reducible over \mathbb{Z} then it is reducible over \mathbb{Q} . (ii) If $f(x)$ is reducible over \mathbb{Q} then it is reducible over \mathbb{Z} . | 4.0 | 1.00 |

| | | | | |
|--------------------|----|--|-----|------|
| | | <p>A1 Both (i) and (ii) are true. :</p> <p>A2 (i) is true but (ii) is not true. :</p> <p>A3 (ii) is true but (i) is not true. :</p> <p>A4 Neither (i) nor (ii) is true. :</p> | | |
| Objective Question | | | | |
| 12 | 12 | <p>If n is a prime then the polynomial</p> <p>(i) $(n+1)x^n + n^n x^{n-1} + n^{n-1} x^{n-2} + \dots + n^2 x + n$ is irreducible over \mathbb{Z}. (ii) $x^{n-1} + x^{n-2} + \dots + x + 1$ is irreducible over \mathbb{Z}.</p> <p>A1 Both (i) and (ii) are true. :</p> <p>A2 (i) is true but (ii) is not true. :</p> <p>A3 (ii) is true but (i) is not true. :</p> <p>A4 Neither (i) nor (ii) is true. :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 13 | 13 | <p>The ring $\mathbb{Z}[\sqrt{-5}]$ is</p> <p>A1 not an integral domain. :</p> <p>A2 integral domain but not a unique factorization domain. :</p> <p>A3 unique factorization domain but not an Euclidean domain. :</p> <p>A4 Euclidean domain but not a field. :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 14 | 14 | <p>$\mathbb{Q}[x]/(x^5-5)$</p> <p>A1 is not an integral domain. :</p> <p>A2 is an integral domain but not a field. :</p> <p>A3 is a field. :</p> <p>A4 Is a finite ring.</p> | 4.0 | 1.00 |

| | | | | |
|--------------------|----|--|-----|------|
| | | : | | |
| Objective Question | | | | |
| 15 | 15 | <p>Let $f(x)$ be a polynomial over a infinite field F. Then</p> <p>A1 : $f(x)$ has all its roots in F.</p> <p>A2 : there exists a finite extension of F in which $f(x)$ has all its roots in it.</p> <p>A3 : There may not be a finite extension but there exists an infinite extension in which $f(x)$ has all roots in it.</p> <p>A4 : There need not be any field extension of F in which $f(x)$ has all roots in it.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 16 | 16 | <p>Let a and b be two distinct roots of the polynomial $3x^4 - 4x^3 + 2x^2 - 6$.</p> <p>A1 : $\mathbb{Q}[a]$ is equal to $\mathbb{Q}[b]$</p> <p>A2 : $\mathbb{Q}[a]$ need not equal to $\mathbb{Q}[b]$ but $\mathbb{Q}[a]$ is isomorphic to $\mathbb{Q}[b]$.</p> <p>A3 : $\mathbb{Q}[a]$ need not be isomorphic to $\mathbb{Q}[b]$ but $[\mathbb{Q}[a] : \mathbb{Q}] = [\mathbb{Q}[b] : \mathbb{Q}]$.</p> <p>A4 : $[\mathbb{Q}[a] : \mathbb{Q}]$ need not equal to $[\mathbb{Q}[b] : \mathbb{Q}]$.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 17 | 17 | <p>Let f be a function from E to \mathbb{R}^m, where E is a open subset of \mathbb{R}^n and f is differentiable at a point x in E. Then the derivative $f'(x)$ is</p> <p>A1 : a scalar</p> <p>A2 : an element of $L(\mathbb{R}^m, \mathbb{R}^m)$</p> <p>A3 : an element of $L(\mathbb{R}^n, \mathbb{R}^m)$</p> <p>A4 : an element of $L(\mathbb{R}^m, \mathbb{R}^n)$</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 18 | 18 | <p>Let f be a function from E to \mathbb{R}^n, where E is a open subset of \mathbb{R}^n and f is differentiable on E. If for a point x in E, $f'(x)$ is invertible linear operator then</p> <p>A1 : f is invertible on E.</p> <p>A2 : f is invertible on some open subset of E containing x.</p> | 4.0 | 1.00 |

| | | | | |
|--------------------|----|--|-----|------|
| | | <p>A3 : f is invertible on an open subset of E not containing x.</p> <p>A4 : f need not be invertible on any infinite subset of E.</p> | | |
| Objective Question | | | | |
| 19 | 19 | <p>Let a be an element in an infinite extension of a field F.</p> <p>(i) a is algebraic over F if a is contained in a finite extension of F. (ii) If a is not algebraic over F then, F(a) is an infinite extension of F.</p> <p>A1 : Both (i) and (ii) are true.</p> <p>A2 : (i) is true but (ii) is not true.</p> <p>A3 : (ii) is true but (i) is not true.</p> <p>A4 : Neither (i) nor (ii) is true.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 20 | 20 | <p>Let G be a finite group with order of G is $p^k m$ where p does not divide m, then which one of the statements is not correct?</p> <p>A1 : Any two sub groups of G with order p are isomorphic.</p> <p>A2 : Any two subgroups of order p^k are isomorphic.</p> <p>A3 : There exists unique subgroup of order p^k.</p> <p>A4 : For every r, less than or equal to k, there exists a subgroup of order p^r.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 21 | 21 | <p>Any group of order 77 is</p> <p>A1 : cyclic.</p> <p>A2 : abelian but not cyclic.</p> <p>A3 : not abelian.</p> <p>A4 : a group with non trivial center.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 22 | 22 | <p>Let M be an ideal of a commutative ring R with identity such that the quotient ring R/M has only one proper ideal, then</p> <p>A1 : M is a zero ideal.</p> | 4.0 | 1.00 |

| | | | | |
|--------------------|----|---|-----|------|
| | | <p>A2 : $M = R$.</p> <p>A3 : M is not properly contained in any proper ideal of R.</p> <p>A4 : M is not closed under multiplication.</p> | | |
| Objective Question | | | | |
| 23 | 23 | <p>Let R be an integral domain. Then which one of the following statement is not possible.</p> <p>A1 : R contains a subring isomorphic to the quotient ring $\mathbb{Z}/p\mathbb{Z}$ for some prime number p.</p> <p>A2 : R contains a subring isomorphic to \mathbb{Z}.</p> <p>A3 : There exists an integer n and an element a in R such that $n \cdot a = 0$.</p> <p>A4 : Every prime ideal of R is non trivial.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 24 | 24 | <p>Let R be a commutative ring with identity and $f(x)$ in $R[x]$ with degree n.</p> <p>A1 : Then $f(x)$ has exactly n roots in R.</p> <p>A2 : $f(x)$ may have more than n roots in R.</p> <p>A3 : $f(x)$ has at least one root in R.</p> <p>A4 : $f(x)$ has at least one root in the quotient field of R.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 25 | 25 | <p>The last digit of 2^{100} is</p> <p>A1 : 2</p> <p>A2 : 4</p> <p>A3 : 6</p> <p>A4 : 8</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 26 | 26 | <p>$\lim_{x \rightarrow \infty} \frac{\log x}{x} =$</p> | 4.0 | 1.00 |

| | | | | |
|--|--|---|--|--|
| | | <p>A1 : 1</p> <p>A2 : 0</p> <p>A3 : ∞</p> <p>A4 : Positive Finite real number other than 1.</p> | | |
|--|--|---|--|--|

Objective Question

| | | | | |
|----|----|--|-----|------|
| 27 | 27 | <p>Which of the following real valued function is not Riemann integrable on [0,2].</p> <p>A1 : $f(x) = \sin x$</p> <p>A2 : $f(x) = [x]$, the absolute value of x</p> <p>A3 : $f(x) = \begin{cases} 0 & \text{if } x \text{ is rational} \\ 1 & \text{if } x \text{ is irrational} \end{cases}$</p> <p>A4 : f is continuous at almost every point in [0,2]</p> | 4.0 | 1.00 |
|----|----|--|-----|------|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 28 | 28 | <p>Define $f(x) = \begin{cases} x^2 \sin \frac{1}{x} & x \neq 0 \\ 0 & x = 0 \end{cases}$. Then</p> <p>A1 : f is differentiable at every point in R except 0</p> <p>A2 : f is differentiable at every point in R including 0</p> <p>A3 : f is differentiable at every point x in R such that $x > 10$</p> <p>A4 : f is nowhere differentiable.</p> | 4.0 | 1.00 |
|----|----|---|-----|------|

Objective Question

| | | | | |
|----|----|--|-----|------|
| 29 | 29 | <p>Which of the following is/are not possible.</p> <p>(i) The image of a continuous real valued function on a compact metric space is the whole R. (ii) We can find a function f which is differentiable at every point of [0,2] such that $f'(x)$ takes only the value 0 and 1. (iii) The continuous image of a real valued function on a connected metric space is an interval. (iv) Every separable metric space is second countable.</p> <p>A1 : (i) and (ii)</p> <p>A2 : (i)</p> | 4.0 | 1.00 |
|----|----|--|-----|------|

| | | | | |
|--------------------|----|---|-----|------|
| | | <p>A3 (ii) :</p> <p>A4 (i) and (iv) :</p> | | |
| Objective Question | | | | |
| 30 | 30 | <p>Sequence $\left\{\frac{\sin n}{n}\right\}$</p> <p>A1 Converge to 1 :</p> <p>A2 Converge to 0 :</p> <p>A3 Oscillates :</p> <p>A4 Diverge to infinity. :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 31 | 31 | <p>Which of the following series converge absolutely?</p> <p>A1 $1 - \frac{1}{1!} + \frac{1}{2!} - \frac{1}{3!} + \frac{1}{4!} - \dots$:</p> <p>A2 $1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \frac{1}{5} - \dots$:</p> <p>A3 $\frac{1}{2} - \frac{2}{4} + \frac{3}{6} - \frac{4}{8} + \dots$:</p> <p>A4 $1 - 1 + \frac{1}{2} - \frac{1}{2} + \frac{1}{3} - \frac{1}{3} + \dots$:</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 32 | 32 | <p>Which of the following is/ are true?</p> <p>(i) Any rearrangement of absolutely convergent series converge to a unique limit. (ii) Rearrangement of series cannot converge to different limits. (iii) Rearrangement of series can converge to any given real number. (iv) Rearrangement of series can converge to at most finite number of limits.</p> <p>A1 (iii) :</p> <p>A2 (ii) :</p> <p>A3 (iii) and (iv) :</p> <p>A4 (i) and (iii) :</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 33 | 33 | How many real valued functions can one define on \mathbb{R} such that $f(x)$ is irrational if x is rational and $f(x)$ is rational if x is irrational? | 4.0 | 1.00 |

| | | | | |
|--|--|---|--|--|
| | | <p>A1 Only finite :</p> <p>A2 Countable infinite :</p> <p>A3 Uncountable :</p> <p>A4 Zero :</p> | | |
|--|--|---|--|--|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 34 | 34 | <p>A subset A of a topological space X has empty boundary if and only if</p> <p>A1 X is compact. :</p> <p>A2 A is open. :</p> <p>A3 A is open and closed. :</p> <p>A4 A is closed and X is compact. :</p> | 4.0 | 1.00 |
|----|----|---|-----|------|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 35 | 35 | <p>Let X be the set of all real number with the topology consisting of the empty set together with all subsets of X whose complements are finite. Then any infinite subset of X is</p> <p>A1 dense. :</p> <p>A2 dense and so is its complement. :</p> <p>A3 open. :</p> <p>A4 closed. :</p> | 4.0 | 1.00 |
|----|----|---|-----|------|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 36 | 36 | <p>Let X be a compact space, Y be a metric space and f be a continuous function from X into Y. Then</p> <p>A1 f is open. :</p> <p>A2 f is bijective. :</p> <p>A3 f(X) is finite. :</p> <p>A4 f(X) is bounded. :</p> | 4.0 | 1.00 |
|----|----|---|-----|------|

| | | | | |
|--------------------|----|--|-----|------|
| Objective Question | | | | |
| 37 | 37 | <p>Which of the following is false?</p> <p>A1 : All projections are both open and closed.</p> <p>A2 : All projections are open but may not be closed.</p> <p>A3 : All projections are neither open nor closed.</p> <p>A4 : All projections are closed but may not be open.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 38 | 38 | <p>Which of the following is true?</p> <p>A1 : Every metric space is a compact Hausdorff space.</p> <p>A2 : Every compact Hausdorff space is a metric space.</p> <p>A3 : Every Hausdorff space is a normal space.</p> <p>A4 : Every metric space is a normal space.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 39 | 39 | <p>If G is a regular bipartite graph then</p> <p>A1 : G is 2-factorable.</p> <p>A2 : G is 1-factorable.</p> <p>A3 : G has a cut vertex.</p> <p>A4 : G has a cut edge.</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 40 | 40 | <p>If G is simple graph whose chromatic number is 120 then</p> <p>A1 : Independence number of G cannot be more than 121.</p> <p>A2 : the number of edges in G is at least $\binom{20}{2}$.</p> <p>A3 : maximum degree of G is at most 118.</p> | 4.0 | 1.00 |

| | | | | |
|--------------------|----|--|-----|------|
| | | <p>A4 there exist a clique of size 20.</p> <p>:</p> | | |
| Objective Question | | | | |
| 41 | 41 | <p>If G is k-critical, then</p> <p>A1 $\delta \leq k-1$</p> <p>:</p> <p>A2 $\delta \geq k-1$</p> <p>:</p> <p>A3 $\Delta \leq k-1$</p> <p>:</p> <p>A4 G contains a cut vertex</p> <p>:</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 42 | 42 | <p>Let $S = \left\{ \frac{1}{n} : n \in N \right\} \cup \{0\}$ and $T = \left\{ n + \frac{1}{n} : n \in N \right\}$ be the subsets of the metric space R with the usual metric. Then</p> <p>A1 S is complete but not T</p> <p>:</p> <p>A2 T is complete but not S</p> <p>:</p> <p>A3 both S and T are complete</p> <p>:</p> <p>A4 neither T nor S is complete</p> <p>:</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 43 | 43 | <p>Let A and B be fuzzy sets, and the operation \wedge on fuzzy sets defined by</p> <p>A1 $\mu_A(x) \wedge \mu_B(x) = \max \{ \mu_A(x), \mu_B(x) \}$</p> <p>:</p> <p>A2 $\mu_A(x) \wedge \mu_B(x) = \min \{ \mu_A(x), \mu_B(x) \}$</p> <p>:</p> <p>A3 $\mu_A(x) \wedge \mu_B(x) = \mu_A(x) - \mu_B(x)$</p> <p>:</p> <p>A4 $\mu_A(x) \wedge \mu_B(x) = 0$</p> <p>:</p> | 4.0 | 1.00 |
| Objective Question | | | | |
| 44 | 44 | <p>The algebraic sum of fuzzy set A and B is defined by</p> <p>A1 $\mu_{A+B}(x) = \mu_A(x) + \mu_B(x)$</p> <p>:</p> | 4.0 | 1.00 |

| | | | | |
|--|--|--|--|--|
| | | <p>A2 $\mu_{A+B}(x) = \mu_A(x)\mu_B(x)$:</p> <p>A3 $\mu_{A+B}(x) = \mu_A(x) + \mu_B(x) - \mu_A(x)\mu_B(x)$:</p> <p>A4 $\mu_{A+B}(x) = \mu_A(x) + \mu_B(x) + \mu_A(x)\mu_B(x)$:</p> | | |
|--|--|--|--|--|

Objective Question

| | | | | |
|----|----|--|-----|------|
| 45 | 45 | <p>The radius of convergence of the power series $\sum_{n=0}^{\infty} \frac{(2n)!}{(n!)^2} (z - 3i)^n$ is</p> <p>A1 $1/4$:</p> <p>A2 4 :</p> <p>A3 1 :</p> <p>A4 $1/2$:</p> | 4.0 | 1.00 |
|----|----|--|-----|------|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 46 | 46 | <p>For the function $\frac{1}{(2 \sin z - 1)^2}$</p> <p>A1 $z=0$ is a simple pole :</p> <p>A2 $z=0$ is a removable singularity :</p> <p>A3 $\frac{\pi}{6}$ is a pole of order 2 :</p> <p>A4 $\frac{\pi}{3}$ is a pole of order 2 :</p> | 4.0 | 1.00 |
|----|----|---|-----|------|

Objective Question

| | | | | |
|----|----|--|-----|------|
| 47 | 47 | <p>If $k(G)$ and $k'(G)$ denotes the vertex connectivity and edge connectivity of a graph G then $k(G)=k'(G)$ if</p> <p>A1 G is a simple graph with only even degree vertices. :</p> <p>A2 G is a simple graph whose maximum degree is at most 4. :</p> <p>A3 G is a simple 3-regular graph. :</p> <p>A4 G is Hamiltonian. :</p> | 4.0 | 1.00 |
|----|----|--|-----|------|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 48 | 48 | For a simple connected graph G , which of the following statement is wrong? | 4.0 | 1.00 |
|----|----|---|-----|------|

| | | | | |
|--|--|---|--|--|
| | | <p>A1 : An edge of G is not a cut edge iff it belongs to a cycle.</p> <p>A2 : G is 3-edge connected iff each edge of G is exactly the intersection of two cycles.</p> <p>A3 : If G is critical then no vertex cut is a clique.</p> <p>A4 : If $\alpha(G)$ denotes the independence number of G then, $\frac{n}{\alpha(G)} \leq \chi(G) \leq n - \alpha(G) - 1$.</p> | | |
|--|--|---|--|--|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 49 | 49 | <p>Every convergent sequence in a topological space X has a unique limit if</p> <p>A1 : X is a T_1-space.</p> <p>A2 : X is a compact space.</p> <p>A3 : X is a Hausdorff space.</p> <p>A4 : X is a second countable space.</p> | 4.0 | 1.00 |
|----|----|---|-----|------|

Objective Question

| | | | | |
|----|----|---|-----|------|
| 50 | 50 | <p>Let T_1 be the usual topology on \mathbb{R}. Define another topology T_2 on \mathbb{R} by $T_2 = \{A \subseteq \mathbb{R} \mid A \text{ is either countable or empty or whole of } \mathbb{R}\}$.
