E- CIRCULAR

Trial Access to Scopus Database & Scopus AI

Ananda Rangapillai Library, Pondicherry University has obtained one month trial access to the **Scopus database & Scopus AI** through the One Nation One Subscription (ONOS), INFLIBNET. The database can be accessed via the Pondicherry University campus network and through the remote login facility.

Scopus uniquely combines a comprehensive, expertly curated abstract and citation database with enriched data and linked scholarly literature across a wide variety of disciplines. Scopus quickly finds relevant and authoritative research, identifies experts and provides access to reliable data, metrics and analytical tools.

Scopus AI is a search tool that utilizes generative AI (GenAI) technology to assist users in retrieving and summarizing information. Built in close collaboration with the academic community, it provides insights by surfacing information from metadata, abstracts, and author profiles in Scopus, Elsevier's source-neutral and curated abstract and citation database.

Scopus AI uses natural language processing. That means that instead of searching for the right keywords or Boolean operators, you can just type in your question, statement or hypothetical using everyday language. Depending on what you want to know, Scopus AI's Copilot query tool decides whether to use a vector and/or keyword search to locate relevant documents from across the 7,000+ publishers in the database, focusing on those published since 2003. It synthesizes the content of these documents' abstracts to create a referenced Summary of the information you are seeking.

While on the campus network, users can access Scopus & Scopus AI through the URL: <https://www.scopus.com> or <https://lib.pondiuni.edu.in/edatabase.php>.

Off-Campus Access: Registered users of MyLoft (Remote Access) can access the Scopus & Scopus AI anytime, anywhere via off-campus network access through the URL: <https://app.myloft.xyz/user/login>

Kindly make the best use of this Scopus Database & Scopus AI to support and strengthen your research.

For more details please contact Ananda Rangapillai Library.
